

60m Waysafe B.A. Line

The Waysafe illuminated B.A. Line marking system has been designed for use in low light or dark or smoke filled environments either internally or externally. It enables the user to clearly mark a safe route.

One of the many benefits of this products over conventional systems is that once the line is deployed, it increases the time at the fire face due to the fact that fire fighters will be able to move more efficiently to and from the scene.

This 60m unit is contained within its own bag which can be worn by the user; the cable can be pulled from the bag and tied off as usual. The illuminated line is fitted with indicators which are fixed on the cable, so in the extremely rare situation where power to the cable was lost, the user could simply follow the cable using the same system that is currently in operation.

**Typical UK users include but are not limited to:
Fire & Rescue Services**

The most effective, cost efficient and visibly effective way of marking safe routes and areas of danger. This UK designed and built product offers the flexibility you require to undertake your task.

Battery Waysafe

Illumination Durations at 60m

Full Illumination mode: 30 Hours
Tensile Strength 65 Kilos
Cable Diameter; 5 mm

Power Output

Voltage: 12 v Nominal
14.4v Max

Recharge Information

Recharge time: 3.5 Hours
No of Recharges: 600

Weights

Part Numbers PWBA-60M

IP Rating

Dimensions

IP65

A = 235 mm
C = 110mm
H = 300mm

B = 135mm
F = 210mm
T = 180mm
